AEROPING

SETUP GUIDE

TO GET STARTED...

1. | Ensure your AeroPing is fully charged. This is crucial to establish the initial GPS connection.
2. | Slide the side switch to 'Set'.
3. | LED will pulse red.
4. | Open your mobile device's 'Wi-Fi' settings.
5. | From the list, select 'AeroPing-Config'.

6. | Enter your 'Operator ID' and 'Operator Description'.
Operator ID - Enter your pilot ID, drone operator ID or Part 107 license number.
(Please note Field is 21 character alphanumeric. Do not enter any special characters.)
Operator Description - Enter the reason for your drone flight
(E.g. Drone aerial survey, photography, filming event etc.)
7. | Click 'Submit'.

AEROPING

SETUP GUIDE

- Secure the enclosed velcro stickers to the AeroPing and your drone.
- Attach AeroPing to drone with velcro squares (included) or velcro strap.
- Slide AeroPing side switch to 'Fly'.
- LEDs will flash red and green whilst a GPS connection is established. Once connected, the LED will turn solid green.
(Please note - the module must be outside to obtain a GPS signal)
- Begin your flight.

UPDATING YOUR FLIGHT DETAILS

- Access the 'AeroPing-Config' once page again.
- Delete the current saved information and re-type the updated info.
